SRS/SDD Self-Review Report – Review 2

1. Run Information

Project code	FA26SE260
Project name	CampusStay FPT – Dormitory Registration and Room-Scheduling Management System for FPT University's Tân Uyên Campus, Binh Duong
Team	CampusStay FPT — Lê Thành Minh Trung (Leader), Nguyễn Xuân Lộc, Trần Võ Quang Duy, Võ Minh Luân
Supervisor	Thân Thị Ngọc Vân
AI tool and model	Claude Code (Anthropic), read-only use of the repository; model Claude Opus 5.5
Run date	08/11/2026
Repository tag / commit	CampusStay-FPT-v0.1, main @ 0ac0318 (31/10/2026): tag review-2 (2c4f35e) plus 9 commits
Registration form version used	2.1 (proposed, 08/11/2026)
Version	2.0 (replaces 1.0 of 28/10/2026)
Date	08/11/2026

2. Standard Prompt

```
You are reviewing the SRS and SDD of a software capstone project against its
registration form and source code. Report only; do not change any file.

Inputs: the registration form, SRS, SDD (with diagrams), source code and
database script in this repository.

Check:
1. Scope: FRs in the SRS not covered by the registration form, and
   registration items with no FR.
2. Requirements: FRs without an actor or testable acceptance criteria;
   NFRs without metric, threshold and measurement method.
3. Data: entities missing from the Logical ERD; ERD entities or attributes
   missing from the database script, and tables not in the ERD.
4. States: for each main entity, states used in code but missing from its
   state machine; transitions with no triggering FR; states with no exit.
5. Flows: main business flows in activity diagrams with no implementation
   or no test.
6. Architecture: components or third-party services in code but not in the
   architecture diagram, and the reverse.
7. Design vs code: modules, APIs or business rules implemented differently
   from the SDD.

Output one table: ID | Category | Location | Finding | Severity
(High/Medium/Low) | Evidence. Then list the 5 most important findings.
If something cannot be verified from the repository, say so; do not guess.
```

3. Findings and Team Response

ID	Category	Location	Finding	Severity	Evidence	Team response
SR-01	Scope	Registration 2.1 §3.2 c) Student, Staff; SRS FR-ASG-04, FR-ASG-06	Self-service check-in and check-out with a room-condition report, a Staff baseline, the student's commitment and the comparison has no FR. FR-ASG-04 and FR-ASG-06 describe a check-in and	High	r3-fr.md §3.6.4 ("At the desk Staff find the student…"), §3.6.6; migrations have asg_check_out and asg_check_out_damage only	Planned – Lê Thành Minh Trung, 30/11/2026: FR, BR, UC, state machine, tables and API (Design Brief G8)

ID	Category	Location	Finding	Severity	Evidence	Team response
			check-out recorded by Staff at the desk.			
SR-02	Scope	Registration 2.1 §3.2 b), c) Manager, Student, Staff	Family Day (events, time slots, visitor registration and approval, one pass per visitor, identity check, visitor check-in and check-out, no-shows, visitors not checked out, event report) has no FR, no code and no tables. Only the visitor hours of a Block exist.	High	No event/visitor/gate entry in r3-fr.md or migrations V1–V69; BlockSettingsService.java:125–139 (visitor hours only)	Planned – Võ Minh Luân, 30/11/2026: module VIS: FR, BR-FD, UC, ERD, WF-06, API, screens, tests (G9)
SR-03	Scope	Registration 2.1 §3.2 b), c) Student, Administrator, automation	The AI chatbot (signed-in and public mode) and its knowledge base have no FR in the SRS; no chatbot code is in the repository, so its behaviour and data scope cannot be verified from the repository.	High	No chatbot FR in r3-fr.md; no chatbot, Ollama or LLM code in backend/, web/, mobile/	Planned – Võ Minh Luân, 30/11/2026: FR-AI, UC Ask AI Assistant, code and tests in the repository (G10)
SR-04	Scope	Registration 2.1 §3.2 c) "requests in one module by type"; SRS §3.6.5, §3.8, §3.9	Requests are specified as separate features with separate screens (late check-in in ASG, next-Term requests in REQ, maintenance in MNT, check-out at the desk); there is no common request type, list or lifecycle.	Medium	r3-fr.md FR-ASG-05, FR-REQ-01…05, FR-MNT-01; 01_Backend_Architecture.md: REQ owns next-Term requests only	Planned – Nguyễn Xuân Lộc, 30/11/2026: common request type and list; FRs regrouped (G11)
SR-05	Scope	Registration 2.1 §3.2 c) Staff furniture; SRS FR-INV-03; ERD INV	Shared items of a Room and personal items of a Bed, confirmed by each student at check-in, are not specified; inv_furniture_item has no scope and no Bed.	Medium	V39__inv_furniture.sql:40–55 (room_id or store_building_id only); r3-fr.md §3.4.3	Planned – Trần Võ Quang Duy, 30/11/2026: scope and bed_id in a new migration; FR-INV-03 and BR updated (G8)
SR-06	Scope	SRS FR-CFG-08	The demo data reset is an FR with no item in the registration form.	Low	r3-fr.md §3.3.8	Kept – a support tool of the demo server (off unless DEMO_TOOLS=true), not a business function
SR-07	Requirements	Registration 2.1 §3.2 d); SRS §4.2.3, §4.2.2	Two registration NFRs have no SRS NFR with metric, threshold and method: the chatbot starts answering within 5 s, and a check-in is recorded only once per Allocation.	Medium	Report3.md §4.2.2–4.2.3 (NFR-01 covers 10 read endpoints and the assignment run only)	Planned – Nguyễn Xuân Lộc, 15/11/2026: add both to NFR-01 and NFR-03 with methods (Design Brief §7)
SR-08	Requirements	SRS §4.2.2, §4.2.3; Report 5 §4.4	The measurement methods of NFR-01 (load script), NFR-03 (concurrency test) and the ≤ 60 s assignment run are not in the repository.	Medium	No load or concurrency script in docs/tools or backend/src/test; Report3.md §4.2.2 says "planned"	Planned – Nguyễn Xuân Lộc (NFR-01) and Lê Thành Minh Trung (NFR-03), 15/11/2026 (G3, G4)
SR-09	Requirements	SRS §4.2.1	Quality bullets without metric and method: Application in ≤ 5 screens, payment claim in 2 actions, portal at 375 px.	Low	Report3.md §4.2.1	Kept – design rules checked in review; the six agreed NFRs have metric, threshold and method
SR-10	Data	Logical ERD; database script	Entities the registration form 2.1 needs are in neither the ERD nor the script: check-in report and	Medium	docs/diagrams/erd-*.drawio (11 files); migrations V1–V69	Planned – Trần Võ Quang Duy (ERD), Võ Minh Luân (vis_*

ID	Category	Location	Finding	Severity	Evidence	Team response
			baseline, event, event slot, visit registration, visitor, gate log, chatbot knowledge.			tables), 30/11/2026 (G8, G9, G10)
SR-11	Data	ERD; V2__cfg.sql; ApplicationStore.java	Status values exist in the schema but no code stores them: cfg_term CLOSED, app_application DRAFT.	Low	V2__cfg.sql:12; ApplicationStore.java:26 (DRAFT only read)	Planned – Lê Thành Minh Trung, 15/11/2026: use or drop in a new migration (G6)
SR-12	States	Term state machine; FR-CFG-05	The Term state Closed has no triggering FR and no code sets it, so published Terms never close.	Medium	AdminTermService.java:97 and AdminSettingsService.java:94 read CLOSED; no UPDATE sets it	Planned – Trần Võ Quang Duy, 15/11/2026: a job closes a Term after its stay end (G6)
SR-13	States	Maintenance state machine; FR-MNT-02	A student can reopen a Resolved request any number of times (reopen_count grows with no limit), which the diagram and FR do not show.	Medium	MaintenanceService.java:253–258	Planned – Nguyễn Xuân Lộc, 15/11/2026: limit or document reopening
SR-14	States	docs/diagrams/state-*.drawio	The lifecycles the registration form 2.1 adds have no state machine: check-in report, event, visit registration, common request.	Medium	16 state diagrams, none for these entities	Planned – Lê Thành Minh Trung (check-in report, common request), Võ Minh Luân (Family Day, registration, visit), 15/11/2026 (G12)
SR-15	Flows	SDD §3.2 activity diagrams	Main flows of the registration form 2.1 have no activity diagram, no implementation and no test: self-service check-in and check-out, Family Day.	High	docs/diagrams/act-wf01…05 only; no code (SR-01, SR-02)	Planned – Lê Thành Minh Trung (check-in/out, in WF-01), Võ Minh Luân (WF-06), 15/11/2026 for diagrams, 30/11/2026 for code (G8, G9, G12)
SR-16	Flows	Report 5 §4.2	The five main workflows are implemented but have no executed end-to-end test: TC-WF-01…05 are manual and Not run.	Medium	_tc-workflows.md: 5 × "Not run"	Planned – Nguyễn Xuân Lộc, 30/11/2026: run on staging, then automate (G2)
SR-17	Architecture	SDD §1.1 architecture diagram; Report 4 technologies	The registration form 2.1 names a local language model (Qwen served by Ollama); it is neither in the architecture diagram nor in the code.	Medium	architecture.drawio (no AI component); no AI service in backend/	Planned – Võ Minh Luân, 15/11/2026: AI component and host in the diagram; code by 30/11/2026 (G10)
SR-18	Design vs code	SRS FR-ASG-04, BR-14; registration 2.1	In code and SDD a student becomes a resident when the door code is released (paid, check-in start, code confirmed), with no report; the registration form 2.1 records the check-in only when the student's report matches the baseline.	Medium	r3-fr.md §3.6.4 ("the code is released and the student becomes a resident (BR-14)")	Planned – Lê Thành Minh Trung, 30/11/2026: resident status set by the matched report (G8)

4. Top 5 Findings (as reported by the AI)

#	Finding ID	Summary
1	SR-01	Self-service check-in and check-out of the registration form has no FR; the SRS and code have a Staff desk.
2	SR-02	Family Day (visitor registration, passes, check-in/out) has no FR, code or tables.

#	Finding ID	Summary
3	SR-03	The AI chatbot has no FR and no code in the repository.
4	SR-15	The new main flows (self-service check-in/out, Family Day) have no activity diagram, code or test.
5	SR-18	Residence starts at door-code release, not at a matched check-in report as the registration form now requires.

5. Summary

Severity	Total	Fixed	Kept	Planned
High	4	0	0	4
Medium	11	0	0	11
Low	3	0	2	1
